DONNING INSTRUCTIONS

SKIPPER WK²⁷⁵

Inflatable life jacket, ISO 12402-3 certified, class 275, effective buoyancy 310 N, inox clasp closure with integrated adjustment.

Conceived as DPI for people working on board for leisure activities in open sea and/or extreme weather conditions, with the possibility to wait for rescue for a long time and in very rough waters.

Specific product to safely work on board and for professional fishermen.

Smart, functional and comfortable donning, thanks to an enveloping design cured in every detail. Designed for the maximum freedom and mobility on board during the manoeuvres in navigation.

CASING FEATURES

- Dorsal strap
- Radio Pocket
- Transparent window for checking the activator
- Front storage pocket
- Neoprene collar fabric
- Velcro closure
- Inox clasp with integrated adjustment
- Rescue assistance loop behind the head
- Lifting handle
- Inserts for light and objects

VERSIONS

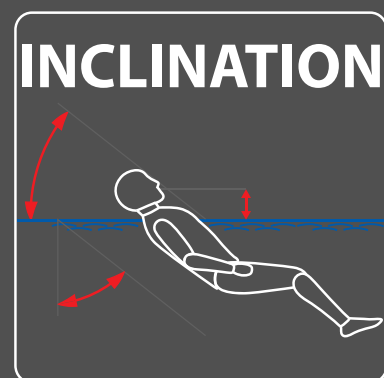

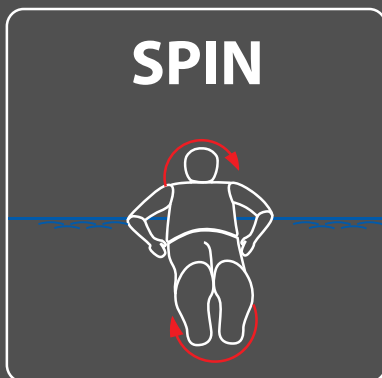

CODE	PRODUCT NAME	ACTIVATION	ACTIVATORS
09675/WK	SKIPPER WK 275	AUTOMATIC	UML MK5
09676/WK	SKIPPER WK 275	MANUAL	UML MICROMANUAL

SKIPPER WK²⁷⁵

Floation chamber with single compartment in PA 420 PU COATED material with electronically-controlled high-frequency welds. Provides optimal positioning and perfect stability in the water. The thrust rotates an unconscious person and angles them so as to keep their airway free of water. What's more, once the chamber is inflated, it is possible to swim unimpeded to reach safety or to quickly climb into a lifeboat.

ACTIVATION SYSTEMS:

- Automatic: upon falling into the water, the system automatically activates within 5 seconds of submersion, with the inflation of the floation chamber. Automatic activation is possible with the salt activator UML MK5, through the dissolution of a water-soluble tablet.
- Manual: the system is operated through pulling the dedicated lever. The product comes with the UML MICROMANUAL activator booklet and is activated exclusively by hand.
- Oral: this type of inflation is achieved via the special mouth tube, with a non-return valve and protective cap. To inflate the chamber, simply blow into the tube.
