09235/24/HX/EVO/H/	SKIPPER EVO 150	HAMMAR	HAMMAR MA1/EC
09236/24/HX/EVO/	SKIPPER EVO 150	MANUAL	UML MICROMANUAL

SKIPPER EVO 150

Floatation chamber with single compartment in PA 420 PU COATED material with electronically-controlled high-frequency welds. Provides optimal positioning and perfect stability in the water. The thrust rotates an unconscious person and angles them so as to keep their airway free of water. What's more, once the chamber is inflated, it is possible to swim unimpeded to reach safety or to quickly climb into a lifeboat.

ACTIVATION SYSTEMS:

- Automatic: upon falling into the water, the system automatically activates within 5 seconds of submersion, with the inflation of the floatation chamber. Automatic activation is possible with the salt activator UML MK5, through the dissolution of a water-soluble tablet.
- Manual: the system is operated through pulling the dedicated lever. The product comes with the UML MICROMANUAL activator booklet and is activated exclusively by hand.
- Oral: this type of inflation is achieved via the special mouth tube, with a non-return valve and protective cap. To inflate the chamber, simply blow into the tube.

SKIPPER EVO 150

SPARE PARTS

	Whistle	25180	Rearming UML: rearming kit (26233), water-soluble tablet (25005), green MK5 pin (25003/MK5) Canister 33 g (26033)
