

EXCLUSIVE SAFETY TECHNOLOGIES

Safety at sea is our main priority. We manage all research, design and production processes with the utmost care so as to offer certified equipment for all nautical fields, with the highest production standards.

All research and development activities are certified by the Department of Applied Science and Technology of the Polytechnic University of Turin, in accordance with EU regulations.

THE PRODUCTION PROCESS AND TRACEABILITY

With the aim of making inflatable life jackets more reliable, in 1994 Veleria San Giorgio introduced the Unique Product Code system. As the only manufacturer in the world to employ this type of technology, VSG is now able to identify all materials and individual components utilised through distinct alphanumeric codes.

ALPHANUMERIC CODES PRINTED ON EACH CHAMBER

È CONFORME ALLA NORMA / IS IN COMPLIANCE WITH THE STANDARD

ISO 9001:2015

Production processes are controlled via software specially developed by VSG, covering 100% of production so each product can be traced back to its buyer with absolute precision.

This drastically reduces manufacturing defects (less than 1/10000 of returns), guaranteeing each buyer a unique product in the truest sense of the word and - most importantly - the highest degree of safety when needed.

Thanks to their ergonomic features, our life jackets guarantee an optimal position in the water and great stability. In addition, the vests offer enough buoyancy to rotate and tilt an unconscious person, so as to always keep the airway out of the water.

The three-dimensional X3D system with single-compartment flotation chamber is made of PA 420 OU COATED material with electronically-controlled high-frequency welding. The system ensures the quick and immediate rotation of the body in the water.

NEW MODULE HX 310

SOLAS M.E.D. -certified inflatable life vest for professional use. Real buoyancy 310 N (02130/25/HX - DAA), 310 N (02131/25/HX - DAAM), 290 N (02132/25/HX - SAA). Integrated ISO 12401 harness with quick-release safety fastening and side-adjustment clasp.

PRODUCT CHARACTERISTICS

- Breathable mesh collar
- Back straps compatible with most fall arrest harnesses
- Opening/closure with Quick Opening zip system
- Quick-release acetalic buckle
- Side adjustment buckle in 316 steel
- Double ring for the safety line
- Rescue aid handle
- Lifting handle
- Buddy system

Fastening mechanism	Safety harness with 45 mm strap, quick-release fastening system and integrated adjustment, double safety belt attachment
Certifications	SOLAS M.E.D. - ISO 12401
Size	Adult
Weight supported	43-140 kg
Waist circumference	Up to 175 cm
Casing	PL 600D PU COATED
Chamber	Dual-compartment flotation chamber with X3D system, PA 420 PU COATED material, fluorescent yellow
Product packaging	Carry case in PL 200D
Product dimensions	Approx. 55x34x7 cm
Product weight	02130/25/HX (approx. 1,950 grams) 02131/25/HX (approx. 1,900 grams) 02132/25/HX (approx. 1,640 grams) 02130/25/HX/H (approx. 1,835 grams) 02131/25/HX/H (approx. 1,857 grams) 02132/25/HX/H (approx. 1,592 grams)
Packaging	60x40x40 cm (box with 7 items)
Servicing	Obligatory every 12 months
Accessories on request	Safety line, sprayhood, automatic emergency light
Spare parts	Whistle, double crotch strap, re-arming kit
Veleria San Giorgio reserves the right to modify the technical specifications without prior notice	

DONNING INSTRUCTIONS

NEW MODULE HX 310

Double-compartment floating chamber with X3D system having a single-compartment rotation system in PA 420 PU COATED fabric with electronically-controlled high-frequency welds. Designed to contour to the body's ergonomics and optimise positioning in the water. Thanks to the special V-shape, it guarantees an immediate rotation of the body and, through the "fins" structure behind the nape, provides excellent support and perfect stability to the wearer's head. The design of this chamber ensures the best freeboard (clearance of the airway above the water) in the category of inflatable jackets.

ACTIVATION SYSTEMS:

- Automatic - Upon falling into the water, the system automatically activates within 5 seconds of submersion, with the inflation of the floatation chamber. Automatic activation is possible with the salt activator UML MK5, through the dissolution of a water-soluble tablet.
- Manual - The system is operated by pulling the appropriate lever. The product comes with the UML MICRO MANUAL manual activator thus is activated exclusively by hand.
- Oral - This type of inflation is via the special mouth tube with non-return valve and protective cap. To inflate the chamber, simply blow into the tube.

LEGEND

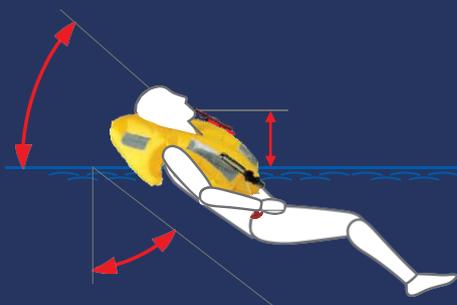

DAA - Dual Automatic Activator

DAAM - Double Automatic and Manual Activator

SAA - Single Automatic Activator

NEW MODULE HX 310

SPARE PARTS

	Double crotch strap	09146
	Use of this accessory improves the body's inclination, stability and positioning in the water	

	Whistle	25180
	A mandatory accessory that emits an audible emergency signal. ISO 12402-8 certified	

Re-arming
UML: re-arming kit (26260), water-soluble tablet (25005), green MK5 pin (25003/MK5), green Micro-Manual pin (25003/UML2) Hammar: re-arming kit (26360) 60-gram canister (26060)

ACCESSORIES

	2 steel hooks	11173
	SAFETY STRAP Length: 2 metres Material: Stainless steel	

	2 aluminium hooks	11174
	SAFETY STRAP Length: 2 metres Material: Aluminium	

	Elast. 2 steel hooks	11176
	SAFETY STRAP Length: 2 metres Material: Stainless steel	

	Elast. 2 aluminium hooks	11177
	SAFETY STRAP Length: 2 metres Material: Aluminium	

	3 aluminium hooks	11175
	SAFETY STRAP Length: 1.4-2 metres Material: Aluminium	

	Steel hook + ring	11178
	SAFETY STRAP Length: 2 metres Material: Stainless steel	

	Sprayhood	09145/AR/GI
	Reduces the risk of secondary drowning via inhalation of nebulised water. Improves castaway detection.	

	LED light	03030
	Automatically activates upon falling into the water. Renders the device visible for up to a mile. SOLAS M.E.D.-certified and USCG approved.
